Manufacturer Sioen Ballistics

DESCRIPTION

Introducing Sioen Ballistics RESTAC PC: a high-performance plate carrier tailored especially for Finnish reservists.

Built to deliver superior protection, functionality, and flexibility, this carrier comes with soft ballistic inserts (front, back & sides) that meet NIJ 0101.04 Level IIIA standards.

The protection level can be enhanced with hard ballistic plates, that are available separately (NIJ Level III+ and IV).

This plate carrier is constructed from rugged Foxdura 500 PU IRR outer fabric, with a soft, breathable polyamide lining for added comfort. The MOLLE system is fully integrated across the carrier, including the cummerbunds, allowing for seamless customization with additional gear and pouches. The cummerbunds include pockets for soft ballistic panels /hard plates, and elastic loops to securely hold magazines and other small essentials eg. first aid supplies.

The front part of the carrier holds elastic loops for efficient cable management, complemented by an integrated admin pouch for convenient storage of tools, mobile devices or documents. Detachable, cushioned shoulder pads offer enhanced comfort.

For additional protection, users can equip the vest with optional add-ons, including: groin protector, upper arm protectors, collar/neck protector, and hard plates. The add-ons are available separately.

Each component reflects European craftsmanship, with soft ballistic inserts manufactured in Finland, and textile parts produced in Europe.

Weight without soft ballistic panels 1,1 kg

Weight with soft ballistic panels: 2,1 kg

Weight with soft ballistic panels + add on protectors (shoulders, neck, groin): 3,4 kg

A bespoke bag is supplied together with the plate carrier.

This product is CE-approved.

Inquiries related to product features should be directed directly to the manufacturer at info@sioenballistics.fi.

The products are not displayed in our factory showroom, and they are only available through our online store.
