DESCRIPTION

A torn neck seal can cost you the dive of your life. The Quick Neck is a modular seal/quick change system that will prevent things like that to happen. The Quick Neck system is revolutionary in simplicity, comfort and function. It ables the user to change a torn or broken seal within minutes by the use of one single tool. The Quick Neck system will save frustration, time and money.

Dive centers installing Quick Neck in their rental drysuits can provide one single suit to be used with different neck seal options/sizes.

Neck Tite can be factory fitted or installed the next time your neck seal needs replacement.

Note: The Quick Neck combi tool is not included.
