DESCRIPTION

Ursuit Softdura is made of highly durable three-layer material, which is still flexible and comfortable to wear. The ergonomics of the suit is top of the line, which makes it perfect for longer dives. Front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth. The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. The waist and the material make the suit feel like a regular garment, and adapt to user's movements smoothly. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance. The Flat Seam –structure enables a durable and flexible seam, which removes uneven layers within the seam. The seam is finished with a taping on both sides. Wear-and-tear of the suit is even further enhanced by the robust Cordura reinforcements on the knees, crotch, bottom and elbows. Roomy and easy accessible Tech-pockets on thighs, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure.
