DESCRIPTION

A special model of the popular RDS Rapid Donning Suit especially made to meet the demands of the offshore industry. Collar structure is open, which eases donning and enables ventilation in warm weather. Material is Gore-Tex® fabric based upon the ePTFE membrane, allowing vapour to get through but remaining completely watertight. Seam construction double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100 % watertight. The suit is equipped with several reflective tapes in right places, which assures visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment. Socks made of same fabric as the suit itself enables use of any professional footwear. Knee and back reinforcements made of Cordura material. Attached hood, which protects against wind and rain. Separate 3 mm neoprene hood, which protects against cold water. Gloves are integrated 3mm 5-finger neoprene gloves in sleeve pockets.
