URSUK OY

URSUK OY

Someone has to lead the way for others to follow

Ursuk Oy is a Finnish company established in 1964. We manufacture Ursuit® dry suits for all kinds of water activities, both under and above the surface. Main product groups are diving, immersion and sailing dry suits. The Ursuit dry suit range consists of over 15 immersion suit models and over 10 diving dry suit models in many colors for both men and women. Because every person is unique Ursuk Oy also manufactures tailor-made dry suits modified for customer needs.

- Modern production facilities in Turku, Finland
- Staff: 70 persons
- Turnover: 10 m eur
- Production: 12 000 suits / year
- Main markets: northern and central Europe
- Clients in USA, Russia and Asia
- Customers all over the world
- Numerous innovations and patents, e.g.:
 - Cordura seam
 - Gemino two-piece dry suit
 - Waterproof ZipLock mechanism
 - Heavy Light's "Copy If You Can" technology

A diver in a dry suit is shown underwater, illuminated by a greenish light. The diver is wearing a black hood, a red and black dry suit, and orange gloves. They are holding a flashlight and a white circular object. A red vertical bar is positioned to the left of the text. The background is dark and rocky.

DRY
SUITS**

URSUIT DIVING DRY SUITS

URSUIT CORDURA FZ

Ursuit Cordura FZ is developed for demanding wreck and technical diving operations, which cannot be compromised by suit breakage. Cordura coated three-layer fabric provides the best possible abrasion and tear resistance, as well as high class durability.

One of Cordura's essential guidelines is the Heavy Light –philosophy, which incorporates heavy performance underwater with lightness and ease above water. In addition to durability and modifiable features, this is one of the main reasons why many defence forces around the world have chosen the Cordura.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. These features make the suit

feel like a regular garment, and adapt to users movements smoothly. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance.

The Flat Seam –structure enables a durable and flexible seam, which removes uneven layers within the seam. The Cordura FZ has additional polyurethane Ursuit Shield -reinforcements on the crotch, bottom, elbows and knees. Roomy and easy accessible Tech-pockets, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure.

Also available in Lady-sizing. The lady model of the suit is bicoloured, with a red upper part and a black lower part.

Weight (Size L): 3,6kg

AVAILABLE COLORS:

The Suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

URSUIT CORDURA BZ

Ursuit Cordura BZ is developed for demanding wreck and technical diving operations, which cannot be compromised by suit breakage. Cordura coated three-layer fabric provides the best possible abrasion and tear resistance, as well as high class durability.

AVAILABLE COLORS:

URSUIT DIVING DRY SUITS

URSUIT CORDURA REDQ

Ursuit Cordura RedQ is developed for the distinctive requirements of rescue diving and surface rescue operations. Durable material and high visibility make the suit also a perfect choice for wreck divers and technical divers.

RedQ is made of highly durable three-layer Cordura material. In addition to its robustness, the suit provides a first-class ergonomics and comfort. A complete set of reflectors as standard enhances the safety of all dives.

Front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. These features make the suit

feel like a regular garment, and adapt to user's movements smoothly. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance.

The Flat Seam –seam structure enables a durable and flexible seam structure, which removes uneven layers within the seam. The RedQ has additional polyurethane Ursuit Shield -reinforcements on the knees. Roomy and easy accessible Tech-pockets, with integrated D-ring and bungee loops. Weight (Size L): 4,0kg

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

URSUIT CORDURA FZ LADY

Ursuit Cordura FZ is developed for demanding wreck and technical diving operations, which cannot be compromised by suit breakage. Cordura coated three-layer fabric provides the best possible abrasion and tear resistance, as well as high class durability.

One of Cordura's essential guidelines is the Heavy Light –philosophy, which incorporates heavy performance underwater with lightness and ease above water. In addition of durability and modifiable features, this is one of the most common reasons why so many defence forces around the world have chosen Cordura.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth. The suit has integrated suspenders, which together with the crotch

strap enable a telescopic waist structure. These features make the suit feel like a regular garment, and adapt to user's movements smoothly.

The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance. The Flat Seam –structure enables a durable and flexible seam, which removes uneven layers within the seam.

The Cordura FZ has additional polyurethane Ursuit Shield -reinforcements on the crotch, bottom, elbows and knees. Roomy and easy accessible Tech-pockets, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure.

URSUIT SOFTDURA

Ursuit Softdura is made of highly durable three-layer material, which is still flexible and comfortable to wear. The ergonomics of the suit is top of the line, which makes it perfect for longer dives.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. The waist and the material properties make the suit feel like a regular garment,

and adapt to user's movements smoothly. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance.

Stitched seams make the suit construction possible without external taping. The durability of the suit is even further enhanced by the robust Cordura reinforcements on the knees, crotch, bottom and elbows. Roomy and easy accessible Tech-pockets on thighs, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure.

Weight (Size L): 4,3kg

URSUIT DIVING DRY SUITS

URSUIT LITE

Ursuit Lite is made of very light and breathable four-layer material. The suit is easy to don, and it dries quickly. Ursuit Lite is perfect for warm water diving.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth. The zipper type is a YKK Aquaseal PU zipper, allowing maximal comfort and adaptivity.

The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. These features combined with the Aquaseal zipper make the suit feel like a regular garment, and adapt to the user's move-

ments smoothly. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance. The suit is equipped with a warm neck collar for added comfort in cold water dives. The warm neck is compatible with most separate hoods.

The suit has Softdura reinforcements at the elbows, knees, shoulders and crotch for enhanced durability.

Weight (Size L): 3,4kg

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

URSUIT BDS KEVLAR

Ursuit BDS Kevlar is a suit developed for demanding operations such as surface rescue, professional diving and technical diving. The material is lightweight and breathable three-layer fabric with 20% Kevlar reinforcement, making the suit very comfortable.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. The waist and the light material make the suit feel like a regular workwear garment, providing best possible ergonomics. The revised cut of the sleeves and shoulders enable

excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance.

Stitched seams make the suit construction possible without external taping. The durability of the suit is even further enhanced by the polyurethane Ursuit Shield -reinforcements on the shoulders, crotch, knees and bottom. Roomy and easy accessible Tech-pockets, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure. The orange coloured version of the BDS Kevlar has also reflectors as a standard feature for added visibility and safety.

Also available in Lady-sizing.

Weight (Size L): 3,8kg

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

URSUIT DIVING DRY SUITS

URSUIT HEAVY LIGHT

Ursuit Heavy Light is a long-term favourite for several different purposes. The very lightweight yet resistant trilaminate material provides excellent performance for both entry level diver and an experienced one.

The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance. The light-build YKK Aquaseal PU zipper provides comfort and adaptability to movement.

The suit is equipped with a warm neck collar for added comfort in cold water dives. The warm neck is compatible with most separate hoods. The suit has integrated suspenders, which together with the crotch strap enable a telescopic

waist structure. These features combined with the Aquaseal zipper make the suit feel like a regular garment, and adapt to the user's movements smoothly. The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The roomy and easily accessible thigh pockets are made from the same material as the suit itself.

Weight (Size L): 3,6kg

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

AVAILABLE COLORS:

URSUIT HEAVY LIGHT RESCUE

Ursuit Heavy Light Rescue is developed for demanding rescue operations. The very lightweight yet resistant trilaminate material is also a good choice for a recreational diver.

The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance.

The colour of the suit combined with the complete set of reflectors enhance the safety of all dives. The reflecting triangle on the back reveals the direction of the diver to other members of the team. Integrated and adjustable suspenders and the crotch strap enable a telescopic waist structure.

The suit is equipped with a warm neck collar for added comfort in cold water dives. The warm neck is compatible with most separate hoods.

The roomy and easy accessible thigh pockets are made of suit material.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

Weight (Size L): 3,8kg

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

URSUIT DIVING DRY SUITS

URSUIT HEAVY LIGHT LADY

Ursuit Heavy Light is a long-term favourite for several different purposes. The very lightweight yet resistant trilaminate material provides excellent performance for both entry level diver and an experienced one.

The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance. The light-build YKK Aquaseal PU zipper provides comfort and adaptability to movement.

The suit is equipped with a warm neck collar for added comfort in cold water dives. The warm neck is compatible with most separate hoods. The suit has integrated suspenders, which together with the crotch strap enable a telescopic

The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The roomy and easily accessible thigh pockets are made from the same material as the suit itself.

The lady model of the suit is bicoloured, with a red upper part and a black lower part.

Weight (Size L): 3,6kg

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

AVAILABLE COLORS:

URSUIT ONE ENDURANCE

The Ursuit One Endurance suit is designed for heavy use in cold conditions for those, who want to have a robust suit with stylish slim design.

The Ursuit One suits have a telescope waist structure which means inside the suit there are integrated braces and together with the crotch strap they form a telescope waist. Thanks to this telescope waist construction of the suit, it feels like a normal garment and ensures that the suit adjusts to the user's movements.

The front zipper allows you easily to dress the suit without outside help. The cover on the zipper protects the jacket from rubbing and keeps the zipper clean from sand and dirt.

The warm neck structure keeps the separate hood in right place. Since the warm neck is not attached to the seam of the seal any kind of hood can be used, even the one with longer collar. This unique structure ensures that you can use the suit also in a really cold water.

Bellow type pockets on both thighs, divided into sections. The pocket flap is designed so that it is easy to open even with dry gloves on. Round shape of the pocket is stylish but also practical in use. As a standard there is also a small pocket in the flap with zip closure.

The suit has Tech Dry Boots that are lightweight and flexible.

Cordura reinforcements on shoulders, elbows, bottom and knees.

Also available in Lady-sizing.

Weight (Size L): 4,0g

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

URSUIT DIVING DRY SUITS

URSUIT ONE PERFORMANCE

The Ursuit One Performance is made of trilaminate material, that is light, but yet flexible in use. It is a good choice also for diving in cold water, because of the fabric.

The front zipper allows you easily to don the suit without outside help. The cover on the zipper protects the jacket from rubbing and keeps the zipper clean from sand and dirt.

The warm neck structure keeps the separate hood in right place. Since the warm neck is not attached to the seam of the seal any kind of hood can be used, even the one with longer collar. This unique structure ensures that you can use the suit also in a really cold water.

Simple bellow type pockets on both thighs. The pocket flap is designed so that it is easy to open even with dry gloves on. Round shape of the pocket is stylish but also practical in use.

The suit has Tech Dry Boots that are lightweight and flexible.

Cordura reinforcements on shoulders, elbows, bottom and knees.

Also available in Lady-sizing.

Weight (Size L): 3,6kg

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

URSUIT PURSUIT X3

The Ursuit Pursuit X3 is designed for hard work and for extremely dirty working conditions. The model can be modified for special requirements, such as for rescue or surface rescue tasks, or for heavy helmet diving.

Thermoplastic polyurethanes stands good for example organic oil and is easy to clean from grease and other impurities. The seams of the suit are fastened and sealed with high frequenz welding that allows fastening without using any glue and therefore seams are stronger than the material itself.

Despite it's durability all the ergonomical features that improves working comfort has been taken into account.

Instead of the traditional neoprene hood the suit is also available with collar that can be used with diving helmet and instead of neoprene boots the suit is available with PU-working boots with a steel reinforcement.

The suit is even more long-lasting thanks to the back zipper with zip cover.

As a special equipment for surface rescue operators and rescue divers the suit is available with integrated inflatable buoyancy vest. As an additional equipment also available with integrated loops that help and fasten dressing in narrow spaces like fire trucks.

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC

URSUIT DIVING DRY SUITS

URSUIT HEAVY CHEM

Chemical protection suit for professional use

Vented, gas and liquid-proof suit protects from several liquid and gaseous chemicals. Breathing air supply to be worn outside of the suit. Type-examined by the Finnish Institute of Occupational Health.

Available on request, please contact sales.

CE

URSUIT X-TEX FINNFILL LIGHT 0,83CLO

The Ursuit X-Tex Finnfill underwear is elastic and watertight, and it provides perfect thermal insulation. It is manufactured of a four layer material, with Finnfill fibre as insulating layer, and breathable watertight X-Tex membrane as intermediate layer. The surface is of elastic and slippery tricot fabric, and the inner lining of fleece.

The Finnfill insulation is the most distinctive property of X-Tex Finnfill underwear. Finnfill material is developed with the most renowned research institutes and polymere manufacturers. The structure of Finnfill insulation is unique. The material does not lose its insulation capacity even after many times of washing. The Finnfill insulating material does not break up like most cotton-wool insulating materials, and therefore it does not either get lumpy or flattened during use or washing. The material also keeps the main part of its insulation capacity when completely wet.

The insulation of X-Tex Finnfill is measured in international Clo-units that shows the real isolation of the suit. In the Light modell the clo grade is 0,83. The breathable and watertight structure of the suit is patented.

The suit has vent holes in the armpits of the left arm which assure the free circulation of air inside and outside of the underwear, and allows air control of the dry suit at any ascent speed. Zipper with double locks, chest pocket with zipper, large thigh pockets, elastic fabric in collar, sleeves, ankles and a wide waist band. Thumb loops and leg retainers ease donning.

Recommended for warm water diving and under immersion suits in normal conditions.

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14058:2004

URSUIT UNDERWEAR

URSUIT X-TEX FINNFILL HEAVY 1,97CLO

Heavier version of the X-Tex Finnfill underwear. Suitable especially for cold water diving and under immersion suits in winter conditions.

The Ursuit X-Tex Finnfill underwear is elastic and watertight, and it provides perfect thermal insulation. It is manufactured of a four layer material, with Finnfill fibre as insulating layer, and breathable watertight X-Tex membrane as intermediate layer. The surface is of elastic and slippery tricot fabric, and the inner lining of fleece.

The Finnfill insulation is the most distinctive property of X-Tex Finnfill underwear. Finnfill material is developed with the most renowned research institutes and polymere manufacturers. The suits are CE-approved according to the directive 89/686/EEC, and the standard EN 14058:2004

URSUIT SFU

The Ursuit SFU (Seamless Functional Underwear) is a technical underwear for active use. The Ursuit SFU underwear is produced with seamless knitting technique and is therefore comfortable in use - like a second skin.

Material: 67% Polypropylene, 26% polyamide, 7% elastane.

The Material is breathable and antibacterial which prevents odor. Therefore the Ursuit SFU is the underwear for the most demanding user.

The Ursuit SFU underwear is designed especially to be used underneath a dry suit, to be

worn next to the skin. The skin remains dry and cool even during and after a hard exercise. Between the Ursuit SFU underwear and the dry suit we recommend the use of an X-Tex® Finnfill Light or Heavy thermal undersuit, to create the necessary thermal insulation.

Washing instruction for the product: 40°C, without rinsing agent. No drying machine, no bleaching.

Available in male and female sizes.

PROFESSIONAL
DRY
SUITS

URSUIT SEA HORSE SAR

The non insulated Ursuit® Sea Horse SAR (5020II) is designed for hard professional use. It has been chosen by the defence forces, border guards, sea rescue associations, and merchant vessels in several European countries. Especially for open sea conditions it has proved to be by far the best of immersion suits.

Material: Gore-Tex® fabric based upon the ePTFE membrane, which lets vapour penetrate but which is completely watertight.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100 % watertight.

Dry zipper: opens from the right hip up to the left shoulder. The position of the zipper as well as its opening direction minimize the disadvantages of a heavy zipper when sitting and moving around.

Telescope waist: integrated braces keep the trouser part up at the same time as the crotch strap keeps the upper part down. Thanks to the

telescope design the trousers do not fall down in the way they may do in a normal one piece overall. Persons of different height can use the same suit without the ergonomic features being weakened.

Neck seal: 2,5 mm super stretch neoprene. For easy donning, rubber surface is on the outside.

Wrist seals: super stretch neoprene, easy to don and doff. The neoprene also keeps you warm in cold conditions.

Thermal hood: 3 mm neoprene, protects against cold water.

The Ursuit Sea Horse SAR suit is SOLAS approved, 1hr.

AES approved together with AES vest 70N.

The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1.

URSUIT RDS WE WIND ENERGY

A special model of the popular RDS Rapid Donning Suit especially made to meet the demands of the offshore industry.

Collar structure is open, which eases donning and enables ventilation in warm weather.

Material: Gore-Tex® fabric based upon the ePTFE membrane, allowing vapour to get through but remaining completely watertight.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100 % watertight.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assures visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment.

Socks made of same fabric as the suit itself enables use of any professional footwear.

Knee and back reinforcements made of Cordura material.

Hood: attached hood, which protects against wind and rain. Separate 3 mm neoprene hood, which protects against cold water.

Gloves: integrated 3mm 5-finger neoprene gloves in sleeve pockets.

The Ursuit RDS WE suit is SOLAS approved, 1hr.

AES approved together with AES vest 70N.

The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1.

RDS RAPID DONNING SUIT

RDS suit is especially suitable for emergency situations with quick departures. It is light and comfortable and it's suitable for authorities as a boating suit and for leisure boating and fishing.

Collar structure is open, which eases donning and enables ventilation in warm weather.

Material: Gore-Tex® fabric based upon the ePTFE membrane, allowing vapour to get through but remaining completely watertight.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100% watertight.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assures visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment.

Boots: Polyurethane boots with broad fitting and strong non slip soles.

Knee and back reinforcements: Cordura.

Thermal hood: separate 3 mm neoprene hood, which protects against cold water. Attached hood, which protects against wind and rain.

Gloves: integrated 3mm 5-finger neoprene gloves in sleeve pockets.

The Ursuit RDS is SOLAS approved, 1hr.

AES approved together with AES vest 70N.

The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1.

URSUIT RDS ETSO

The RDS ETSO is specially designed as an off-shore helicopter transit suit. The suit is made of highly breathable, flame resistant Gore-Tex Nomex.

The RDS ETSO includes a special detachable liner containing high-tech Outlast material, which is able to adapt to varying heat conditions by absorbing and releasing heat energy. Due to the open-neck structure, the RDS ETSO is very quick to don and doff. Also, when necessary, the ventilation of the suit is very easy. Socks made of same fabric as the suit itself enables use of any professional footwear.

Knee and back reinforcements made of Cordura material.

Attached splash hood, which protects against wind and rain. In addition a separate 3 mm neoprene hood, which protects against cold water. 3mm 5-finger neoprene gloves are integrated in sleeve pockets.

Supplied in a carrying bag.

The Ursuit RDS ETSO is SOLAS 1hr approved with or without the liner and ETSO-2C503 approved with the liner.

URSUIT OVER WATER FLIGHT SUIT (5030)

A working suit for the pilots and the crew members, which is made of the breathable and wear resistant three-layer Gore-Tex laminate.

Material: most durable Gore-Tex® three layer fabric which breathes. On a request also available in NOMEX (additional price).

Seams: double seams so that the seam does not open even if worn. Inside heat seal taping and reinforcement that guarantees 100 % water tightness.

Colour: orange or green. Sizes: 46 – 58.

Reflective tapes: the suit is equipped with several reflective tapes in right places, which assure visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment.

Adjustable waist elastic. Gore-Tex® socks, leg

zippers. Reinforcement on the knees. Reinforcement at the backside. Dry zipper from the left shoulder to the right hip.

Integrated braces. 2 large thigh pockets with velcro fasteners, velcro fasteners for chart pockets. Knife pocket on the right thigh. Phone pocket on the left thigh. Chest pockets with zippers. 2 velcro fasteners for the attachment of badges on both shoulders.

2 light pockets on the sleeves. 2 pen pockets on the sleeves. 2 leg pockets. Wrist seals of super stretch neoprene, keep the wrists warm. Thermal 5-finger gloves of neoprene, with velcro fasteners. Thermal hood of 3 mm neoprene.

The suit is CE-approved according to the directive 89/686/EEC

URSUIT BASIC

An affordable basic suit with SOLAS approval.

Together with AES 70 N Buoyancy Vest the immersion suit becomes a so called AES suit (Anti Exposure Suit). The combination is in accordance with the requirements of the Directive for Marine Equipment 96/98/EC (MED).

The suits material is waterproof and breathable 4-Tex fabric.

A PU-zipper from the shoulder to the hips. Integrated sleeve pockets with the neoprene gloves.

The Ursuit Basic suit is SOLAS approved.

URSUIT 5001

An abandonment suit for the crew on board in merchant vessels and open rescue boats and isolated survival and rescue suit for the crew on board in fishing boats.

Material: flame retardant 5 mm cell neoprene.

Seams: glued and sewn.

Colour: red.

Reflective tapes: placed in accordance with the directive on marine equipment.

Oil resistant rubber soles. Adjustment straps at the ankles. Dry zipper opens at the left ear. Chest pocket with velcro fastener. Whistle. Buddy line on the left sleeve. Attached 5-finger thermal gloves, with polyurethane surface. Attached neoprene hood with face seal.

The URSUIT 5001 suit is SOLAS approved (6 hr).

URSUIT ONE SIZE

The One Size is a patented suit (patent no 95554), which adapts itself to the measurements of the user. One Size is the suit for adventure travelling and rib safari excursions. It is also the right choice for companies with rental activities, that wish to take care of the safety of their customers, in all conditions. Thanks to the construction of the model the need for different sizes is minimised.

One Size is approved in accordance with the directive on marine equipment. It is also suitable for the varying personnel and passengers on board merchant vessels. One Size grows or gets smaller together with the user. The smallest family members do not have to be left on shore or be sent out to sea without adequate equipment.

Material: Vapour permeable and watertight 4-TEX.

Seam construction: The double seams have an inside elastic, which allows the suit to expand to the measurements of the user. Inside the seams are heat seal taped and reinforced for 100% water tightness.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assure visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment.

The Ursuit One Size is SOLAS approved (1hr).

URSUIT RDS RAPID DONNING SUIT

The Ursuit RDS suit is especially suitable for the user's who are looking for a suit that is quick and easy to don. It is light and comfortable and it is suitable for authorities as a boating suit and for leisure boating and fishing.

Collar structure is open, which eases dressing and enables ventilation in warm weather.

Material: Gore-Tex® fabric based upon the ePTFE membrane, allowing vapour to get through but remaining completely watertight.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100 % watertight.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which

assure visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment.

Boots: Polyurethane boots with broad fitting and strong non slip soles.

Knee and back reinforcements made of Cordura material.

Thermal hood: 3 mm neoprene hood, which protects against cold water. Attached hood, which protects against wind and rain.

The suit is CE-approved according to the directive 89/686/EEC

**DRY
SUITS
FOR MILITARY
USE**

URSUIT RDF

An immersion suit for professional use.

A tactical dry suit for special forces and professionals, manufactured of breathable and wear resistant three-layer Gore-Tex® laminate.

Seams: double seams so that the seam does not open even if worn. Inside heat seal taping and reinforcement that guarantees 100% water tightness.

Construction: One piece suit with integrated socks. Braces inside. Neoprene seals at neck and wrists. Spray hood in the protecting collar. Designed to be used with a helmet. Reinforcements on knees and back.

Details: Plastic front zipper, opening from the left shoulder to the right hip. Plastic pee zip. Pen pocket on both sleeves. Velcro tapes for badges. Phone pocket with zipper closure on the chest.

**DRY
SUITS
FOR WATER
ACTIVITIES**

URSUIT EASY

The Ursuit Easy is a stylish dry suit that is easy to don and doff. Its comfort and appearance are similar to those of normal clothing, yet it is completely waterproof - like any other Ursuit dry suit.

The front zipper opens at the neck seal, assuring easy and fast donning. The dry zipper is covered by a protecting flap with push buttons.

The high collar with fleece lining is detachable when not required, which in some circumstances may be a good option. A protecting hood is found inside the collar. Thanks to the integrated socks, you can choose the footwear which fits your needs in the best possible way.

The Ursuit Easy is not just a dry suit for water activities, but a suit for all kinds of use when you want to stay 100% dry. Thanks to the stylish design, this suit looks more like normal clothing than a dry suit. The fit is also optimal for women thanks to the adjustable waist band.

Water tight chest pockets are standard. The thigh pocket is equipped with fasteners for the

The suit is CE-approved according to the directive 89/686/EEC

attaching of a Squeeze Lock knife (the knife itself is optional).

Material: Vapor permeable and water tight 4-TEX® fabric.

Prominent reflective tapes assure the visibility.

The wrist and neck seals are made of elastic neoprene, making donning easier and adding to the thermal insulation at the wrists and neck.

Separate neoprene gloves and hood give additional thermal protection.

Knee and back reinforcements.

AVAILABLE COLORS:

URSUIT MPS MULTI PURPOSE SUIT

A unique drysuit to combine with any other clothing.

100 % watertight.
Integrated socks.

The Ursuit MPS Multi Purpose Suit is a very lightweight dry suit to be worn under an outer garment like a traditional foul-weather gear. Thanks to the breathable Gore-Tex®-fabric, the MPS will keep you dry, even when worn together with outer clothing that does not breathe.

Extremely light double lock zipper.

Neck seal and wrist seals warming and waterproof 3mm neoprene. Easy to don and doff.

Weight under 1 kg (size L).

The Ursuit MPS is suitable for all kinds of boating, fishing, paddling and for example nordic skating.

Also available in children sizes.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be

CE

The suit is CE-approved according to the directive 89/686/EEC

URSUIT SEA HORSE

A top quality suit for the most demanding user. The URSUIT Sea Horse model includes all of the best properties of an immersion suit. Its ergonomics is of its very own class and the comfort is superior. Thanks to the telescope waist construction it fits well and it is comfortable and light to wear. It keeps you dry regardless of how long you will stay in water. It functions perfectly, in all conditions.

Material: Gore-Tex® fabric based upon the ePTFE membrane, which lets vapour penetrate but which is completely waterproof.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100% watertight.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assures visibility in all conditions. The soft and du-

rable reflective tapes are made in accordance with the directive on marine equipment. Knee and back reinforcement

Dry zipper is situated from the right hip up to the left shoulder. The position of the zipper minimise the disadvantages of a heavy zipper when sitting and moving around.

Telescope waist: integrated braces keep the trouser part up at the same time as the crotch strap keeps the upper part down. Thanks to the telescope design the trousers do not fall down in the way they may do in a one piece overall. Persons of different height can use the same suit without weakening the ergonomic features.

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC

URSUIT SEA HORSE COMFORT

Sea Horse Comfort means a state of physical ease and freedom to focus on the essentials – stay comfortably dry. Thanks to the telescope waist construction it fits well and it is comfortable and light to wear. It keeps you dry regardless of how long you will stay in water. It functions perfectly, in all conditions.

Material: vapour permeable and water tight 4-TEX®.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100% water-tight.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assures visibility in all conditions. The soft and durable reflective tapes are made in accordance with the directive on marine equipment.

Knee and back reinforcement are made of durable Cordura fabric.

Relief zipper as standard.

The suit is CE-approved according to the directive 89/686/EEC

The dry zipper is placed from the right hip up to the left shoulder. The position of the zipper minimizes the disadvantages of zipper when sitting and moving around.

Telescope waist: integrated braces keep the trouser part up at the same time as the crotch strap keeps the upper part down. Thanks to the telescope design the trousers do not fall down in the way they may do in a one piece overall. Persons of different height can use the same suit without weakening the ergonomic features.

URSUIT GEMINO OPERATIVE

The Ursuit Gemino Operative presents the newest technology in the field. Thanks to the two-piece structure you can separate the jacket and the trousers for example while at land. The Ursuit® Gemino Operative is a stylish suit, that keeps you dry and in the swim under all conditions, no matter whether your passion is fishing, boating, paddling or rapid shooting.

Material: four-layer 4-Tex®, that is breathable but still waterproof.

Seam structure: patented seam structure, that is based on the Flat Seam technology. Because of this technology the multiple layers can be avoided.

Neck and wrist seals are made of waterproof and warming Super Stretch neoprene.

Knee and back reinforcements.

Thanks to integrated 4-Tex® socks you can choose shoes that fits best for your needs.

Large, splash waterproof pockets on both thighs.

Anorak style jacket with a large central pocket.

Leg and wrist tightening with reflective tapes.

High collar that is lined with water resistant fleece. Inside the collar yellow fluorescent hood.

Braces in trousers. Fly zipper. Waist band. Includes separate neoprene hood and gloves. In upper part of the trousers a pocket for phone.

Available in red and black.

On a request also available in orange Gore-Tex (SOLAS approved).

AVAILABLE COLORS:

Suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1.

URSUIT GEMINO VENTURE

Ursuit's two-piece drysuit Ursuit® Gemino Venture with light Gore-Tex keeps you dry in all conditions, no matter whether your passion is fishing, boating or paddling. Like other Ursuit suits Gemino Venture is designed with a long lifespan. All the details are results of a long R&D. The CE mark stands for the guarantee of the quality and safety.

Material: Lighter Gore-Tex for optimal mobility

Latex neck and wrist seals assure the water tightness.

Reflective hood with the high thermal collar.

Jacket is lighter Gore-Tex® (135 g/m²) which is optimal for extreme mobility. Design allows wide movement of hands which is ideal for e.g. fishing or paddling.

The jacket flab can be tightened with adjustable velcro straps. Canoeist: the hem of the jacket is long enough to cover the rim of the spraydeck.

Knee and backside reinforcement of durable Cordura® fabric.

Trousers are made of durable Gore-Tex® (185 g/m²) for additional endurance. The design is ideal for e.g. paddling or fishing where the mobility is needed.

Thanks to intergrated Gore-Tex® socks you can choose shoes that fits best for your needs.

The suit is CE-approved according to the directive 89/686/EEC

URSUIT GEMINO ACTIVE

The two-piece Ursuit® Gemini Active is designed for active water sports and it fulfills even the toughest expectations.

Material: four-layer 4-Tex®, that is breathable but still waterproof.

Seam structure: patented seam structure, that is based on the Flat Seam-technology. Because of this technology the multiple layers can be avoided.

Neck and wrist seals: waterproof and warming Super Stretch neoprene.

Knee and back reinforcements.

Thanks to integrated 4-Tex® socks you can choose shoes that fit best for your needs.

In upper part of the trousers a pocket for phone.

Braces in trousers. Waist band. Includes separate neoprene hood and gloves and carrying bag.

On a request also available in orange Gore-Tex.

The orange Gemini Active is SOLAS approved 1hr.

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1.

URSUIT AWS ACTIVE WATERSPORT SUIT

AWS Active Watersport Suit is manufactured for paddling, dinghy sailing and for other activities done in a sitting position. The simple design concentrates on the most essential features: comfort and keeping dry, leaving out excessive details. The suit design considers especially the different measurements of the back and the front parts, to achieve maximum comfort in a sitting position.

Material: Vapour permeable and water tight 4-Tex®.

Seam structure: patented seam structure, that is based on the Flat Seam-technology. Because of this technology the multiple layers can be avoided.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assure visibility in all conditions. The soft and durable reflective tapes are in accordance with the directive on marine equipment.

Neck seal: Patterned 2,5 mm super stretch neoprene. For easy dressing the patterned rubber surface is on the outside.

Wrist seals: super stretch neoprene, easy to dress and undress. The neoprene also keeps your wrists warm in cold conditions.

Thermal hood and gloves: 3 mm neoprene hood protects your head against cold water. The gloves are 5-finger type and made of 3 mm neoprene.

Knee and back reinforcement.

Weight ca. 1,4kg (size L).

Also available in children and lady sizes.

Suit is CE-approved according to the directive 89/686/EEC

AVAILABLE COLORS:
