## Hand made quality to the last detail

Ursuit is a Finnish company established in 1964. We manufacture Ursuit® drysuits for all kinds of water activities, both under and above the surface. Main product groups are diving, rescue and recreational drysuits. The Ursuit drysuit range consists of over 15 surface drysuit models and over 10 diving drysuit models in many colors for both men and women. We also manufacture tailored drysuits that are modified according to customer needs. Ursuit has been THE choice for firebrigaders, rescue teams, military forces, law enforcement and other professionals that trust our drysuits for the most challenging conditions.

Our production is carefully controlled so that the user can concentrate on the most essential, the activity. All Ursuit® drysuits are CE approved and the production is in accordance with the SFS-EN ISO 9001:2015 quality assurance system. Every drysuit is tested before it is delivered to the customer.

DIVING  
DRYSUITS

## URSUIT CORDURA FZ

Ursuit Cordura FZ is developed for demanding wreck and technical diving operations, which cannot be compromised by suit breakage. Cordura coated three-layer fabric provides the best possible abrasion and tear resistance, as well as high class durability.

One of Cordura's essential guidelines is the Heavy Light –philosophy, which incorporates heavy performance underwater with lightness and ease above water. In addition to durability and modifiable features, this is one of the main reasons why many defence forces around the world have chosen the Cordura.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. These features make the suit

feel like a regular garment, and adapt to users movements smoothly. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance.

The Flat Seam –structure enables a durable and flexible seam, which removes uneven layers within the seam. The Cordura FZ has additional polyurethane Ursuit Shield -reinforcements on the crotch, bottom, elbows and knees. Roomy and easy accessible Tech-pockets, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure.

Also available in Lady-sizing. The lady model of the suit is bicoloured, with a red upper part and a black lower part.

Weight (Size L): 4,6kg

AVAILABLE COLORS:

The Suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

## URSUIT CORDURA BZ

Ursuit Cordura BZ is developed for demanding wreck and technical diving operations, which cannot be compromised by suit breakage. Cordura coated three-layer fabric provides the best possible abrasion and tear resistance, as well as high class durability.

One of Cordura's essential guidelines is the Heavy Light –philosophy, which incorporates heavy performance underwater with lightness and ease above water. In addition to durability and modifiable features, this is one of the main reasons why many defence forces around the world have chosen the Cordura. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance.

The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The Flat Seam –structure enables a durable and flexible seam, which removes uneven layers within the seam.

The Cordura BZ has additional polyurethane Ursuit Shield -reinforcements on the crotch, bottom, elbows and knees. Roomy and easy accessible Tech-pockets, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure.

Weight (Size L): 4,6kg

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

## URSUIT CORDURA REDQ

Ursuit Cordura RedQ is developed for the distinctive requirements of rescue diving and surface rescue operations. Durable material and high visibility make the suit also a perfect choice for wreck divers and technical divers.

RedQ is made of highly durable three-layer Cordura material. In addition to its robustness, the suit provides a first-class ergonomics and comfort. A complete set of reflectors as standard enhances the safety of all dives.

Front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. These features make the suit

feel like a regular garment, and adapt to user's movements smoothly. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance.

The Flat Seam –seam structure enables a durable and flexible seam structure, which removes uneven layers within the seam. The RedQ has additional polyurethane Ursuit Shield -reinforcements on the knees. Roomy and easy accessible Tech-pockets, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure.

Weight (Size L): 4,6kg

*The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005*

## URSUIT CORDURA FZ LADY

Ursuit Cordura FZ is developed for demanding wreck and technical diving operations, which cannot be compromised by suit breakage. Cordura coated three-layer fabric provides the best possible abrasion and tear resistance, as well as high class durability.

One of Cordura's essential guidelines is the Heavy Light –philosophy, which incorporates heavy performance underwater with lightness and ease above water. In addition of durability and modifiable features, this is one of the most common reasons why so many defence forces around the world have chosen Cordura.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth. The suit has integrated suspenders, which together with the crotch

strap enable a telescopic waist structure. These features make the suit feel like a regular garment, and adapt to user's movements smoothly.

The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance. The Flat Seam –structure enables a durable and flexible seam, which removes uneven layers within the seam.

The Cordura FZ has additional polyurethane Ursuit Shield -reinforcements on the crotch, bottom, elbows and knees. Roomy and easy accessible Tech-pockets, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure.

Weight (Size L): 4,0kg

*The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005*

AVAILABLE COLORS:

## URSUIT SOFTDURA

Ursuit Softdura is made of highly durable three-layer material, which is still flexible and comfortable to wear. The ergonomics of the suit is top of the line, which makes it perfect for longer dives.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. The waist and the material properties make the suit feel like a regular garment,

and adapt to user's movements smoothly. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance.

Stitched seams make the suit construction possible without external taping. The durability of the suit is even further enhanced by the robust Cordura reinforcements on the knees, crotch, bottom and elbows. Roomy and easy accessible Tech-pockets on thighs, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure.

Weight (Size L): 4,3kg

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

## URSUIT SOFTDURA LADY

## URSUIT LITE

Ursuit Lite is made of very light and breathable four-layer material. The suit is easy to don, and it dries quickly. Ursuit Lite is perfect for warm water diving.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth. The zipper type is a YKK Aquaseal PU zipper, allowing maximal comfort and adaptivity.

The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. These features combined with the Aquaseal zipper make the suit feel like a regular garment, and adapt to the user's move-

ments smoothly. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance. The suit is equipped with a warm neck collar for added comfort in cold water dives. The warm neck is compatible with most separate hoods.

The suit has Softdura reinforcements at the elbows, knees, shoulders and crotch for enhanced durability.

Weight (Size L): 3,4kg

*The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005*

## URSUIT BDS KEVLAR

Ursuit BDS Kevlar is a suit developed for demanding operations such as surface rescue, professional diving and technical diving. The material is lightweight and breathable three-layer fabric with 20% Kevlar reinforcement, making the suit very comfortable.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. The waist and the light material make the suit feel like a regular workwear garment, providing best possible ergonomics. The revised cut of the sleeves and shoulders enable

excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance.

Stitched seams make the suit construction possible without external taping. The durability of the suit is even further enhanced by the polyurethane Ursuit Shield -reinforcements on the shoulders, crotch, knees and bottom. Roomy and easy accessible Tech-pockets, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure. The orange coloured version of the BDS Kevlar has also reflectors as a standard feature for added visibility and safety.

Also available in Lady-sizing.

Weight (Size L): 3,8kg

*The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005*

AVAILABLE COLORS:

## URSUIT HEAVY LIGHT

Ursuit Heavy Light is a long-term favourite for several different purposes. The very lightweight yet resistant trilaminate material provides excellent performance for both entry level diver and an experienced one.

The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance. The light-build YKK Aquaseal PU zipper provides comfort and adaptability to movement.

The suit is equipped with a warm neck collar for added comfort in cold water dives. The warm neck is compatible with most separate hoods. The suit has integrated suspenders, which together with the crotch strap enable a telescopic

waist structure. These features combined with the Aquaseal zipper make the suit feel like a regular garment, and adapt to the user's movements smoothly. The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The roomy and easily accessible thigh pockets are made from the same material as the suit itself.

Weight (Size L): 3,6kg

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

## URSUIT HEAVY LIGHT RESCUE

Ursuit Heavy Light Rescue is developed for demanding rescue operations. The very lightweight yet resistant trilaminate material is also a good choice for a recreational diver.

The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance.

The colour of the suit combined with the complete set of reflectors enhance the safety of all dives. The reflecting triangle on the back reveals the direction of the diver to other members of the team. Integrated and adjustable suspenders and the crotch strap enable a telescopic waist structure.

The suit is equipped with a warm neck collar for added comfort in cold water dives. The warm neck is compatible with most separate hoods.

The roomy and easy accessible thigh pockets are made of suit material.

The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

Weight (Size L): 3,8kg

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

## URSUIT HEAVY LIGHT LADY

Ursuit Heavy Light is a long-term favourite for several different purposes. The very lightweight yet resistant trilaminate material provides excellent performance for both entry level diver and an experienced one.

The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance. The light-build YKK Aquaseal PU zipper provides comfort and adaptability to movement.

The suit is equipped with a warm neck collar for added comfort in cold water dives. The warm neck is compatible with most separate hoods. The suit has integrated suspenders, which together with the crotch strap enable a telescopic

waist structure. These features combined with the Aquaseal zipper make the suit feel like a regular garment, and adapt to the user's movements smoothly. The front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The roomy and easily accessible thigh pockets are made from the same material as the suit itself.

The lady model of the suit is bicoloured, with a red upper part and a black lower part.

Weight (Size L): 3,6kg

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

## URSUIT ONE ENDURANCE 2.0

The ONE Endurance 2.0 is made of our popular softdura material, but with an different cut.

The softdura material is very robust but still flexible as the fabric is soft and have some stretch.

The 2.0 version have some changes in the pattern which gives it a little closer fit around the shoulders and upper arms. The inlet valve is moved to a more standard position on the upper side of the zipper. The zipper is a YKK plastic as standard but it can be ordered with metal zipper id preferred.

Another feature on the 2.0 is a protection for the e/o cord, from a heating valve, when not used, this feature is optional and can be ordered with or without. The seems on the 2.0 has no tapes on the outside, a flat seem with tape on the inside is used on the suit to make a nicer look of the suit.

Weight (Size L): 4,0g

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

## URSUIT ONE PERFORMANCE 2.0

The ONE Performance 2.0 is made of our smooth and popular trilaminate material, but with a different cut comparing to our Ursuit suits. The trilaminate material is very flexible and has the ability to dry fast as very little water gets in to the fabric.

Weight (Size L): 3,6kg

The 2.0 version have some changes in the pattern which gives it a little closer fit around the shoulders and upper arms. The inlet valve is moved to a more standard position on the upper side of the zipper. The zipper is a YKK plastic as standard but it can be ordered with metal zipper if preferred.

Another feature on the 2.0 is a protection for the e/o cord, from a heating valve, when not used, this feature is optional and can be ordered with or without. On the overlay you can choose your color, available are black, blue, grey and red.

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

## URSUIT PURSUIT X3

The Ursuit Pursuit X3 is designed for hard work and for extremely dirty working conditions. The model can be modified for special requirements, such as for rescue or surface rescue tasks, or for heavy helmet diving.

Thermoplastic polyurethanes stands good for example organic oil and is easy to clean from grease and other impurities. The seams of the suit are fastened and sealed with high frequenz welding that allows fastening without using any glue and therefore seams are stronger than the material itself.

Despite it's durability all the ergonomical features that improve working comfort have been taken into account.

Instead of the traditional neoprene hood the suit is also available with collar that can be used with diving helmet and instead of neoprene boots the suit is available with PU-working boots with a steel reinforcement.

The suit is even more long-lasting thanks to the back zipper with zip cover.

As a special equipment for surface rescue operators and rescue divers the suit is available with integrated inflatable buoyancy vest. As an additional equipment also available with integrated loops that help and fasten dressing in narrow spaces.

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14225-2:2005

## URSUIT HEAVY CHEM

Chemical protection suit for professional use

CE approved according to the standard EN 943-2:2002, type 1b-ET gas-tight chemical protective suit for emergency teams. Vented, gas and liquid-proof suit protects from several liquid and gaseous chemicals. Breathing air supply to be worn outside of the suit. Type-examined by the Finnish Institute of Occupational Health.

Available on request, please contact sales.

## URSUIT THERMOFILL LIGHT 0,83CLO

The new Ursuit Thermofill is made of elastic and watertight material, and it provides perfect thermal insulation. It's made from a four layer material, with Finnfill fibre as insulating layer, and breathable watertight X-Tex membrane as intermediate layer. The surface material is an elastic and smooth tricot fabric, and the inner lining is fleece.

Thermofill insulation is the most distinctive property of Thermofill underwear. Thermofill membrane is developed by the most renowned research institutes and polymere manufacturers. The structure of Thermofill insulation is unique. The material does not lose its insulation capacity even after many times of washing. The Thermofill insulation doesn't break up like most cotton-wool insulating materials, and therefore it doesn't get lumpy or flattened with use or after washing.

The material also keeps most of its insulation capacity even when completely wet.

The suit has vent holes in the armpits and on the left arm to assure free circulation of air inside and outside of the underwear, and to allow air control of the dry suit at any ascent speed.

The suit has a zipper with double locks, a chest pocket with zipper, as well as large thigh pockets. Elastic fabric in the collar, sleeves and ankles, and a wide waist band. Thumb loops and leg retainers ease dressing.

*The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14058:2004*

## URSUIT THERMOFILL HEAVY 1,97CLO

Heavier version of the Thermofill underwear. Suitable especially for cold water diving and under immersion suits in winter conditions.

The Ursuit Thermofill underwear is elastic and watertight, and it provides perfect thermal insulation. It is manufactured of a four layer material, with fibre as insulating layer, and breathable watertight X-Tex membrane as intermediate layer. The surface is of elastic and slippery tricot fabric, and the inner lining of fleece.

The insulation is the most distinctive property of the Thermofill underwear. The material is developed with the most renowned research institutes and polymere manufacturers. The structure of the Thermofill insulation is unique. The material does not lose its insulation capacity even after many times of washing. The insulating material does not break up like most cotton-wool insulating materials, and therefore it does not either get lumpy or flattened during use or washing.

The material also keeps the main part of its insulation capacity when completely wet.

In the Heavy model the clo grade is 1,97. The breathable and watertight structure of the suit is patented.

The suit has vent holes in the armpits of the left arm which assure the free circulation of air inside and outside of the underwear, and allows air control of the dry suit at any ascent speed. Zipper with double locks, chest pocket with zipper, large thigh pockets, elastic fabric in collar, sleeves, ankles and a wide waist band. Thumb loops and leg retainers ease donning.

*The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14058:2004*

## URSUIT THERMOFILL XTREME

Our warmest underwear for cold water diving.

Ursuit Thermofill Xtreme underwear is elastic and made of watertight material. It provides a perfect thermal insulation. The four layer material has a special thermal wadding as insulating layer and breathable watertight X-Tex -membrane as intermediate layer. The surface is of elastic tricot and the inner lining of fleece. Double insulation on the chest and thighs to maximize the thermal stability.

*The suit is CE-approved according to the directive 89/686/EEC, and the standard EN 14058:2004*

Light

Heavy

## URSUIT THERMOFILL LADY

The Ursuit Thermofill underwear is elastic and watertight, and it provides perfect thermal insulation. It is manufactured of a four layer material, with fibre as insulating layer, and breathable watertight X-Text membrane as intermediate layer. The surface is of elastic and slippery tricot fabric, and the inner lining of fleece.

The insulation is the most distinctive property of the Thermofill underwear. The structure of Thermofill insulation is unique. The material does not lose its insulation capacity even after many times of washing. The insulating material does not break up like most cotton-wool insulating materials, and therefore it does not either get lumpy or flattened during use or washing.

The insulation of the Thermofill is measured in international Clo-units that shows the real isolation of the suit. In the Light model the clo grade is 0,83, in the Heavy model the clo grade is 1,97. The breathable and watertight structure of the suit is patented.

*The suits are CE-approved according to the directive 89/686/EEC, and the standard EN 14058:2004*

The suit has vent holes in the armpits of the left arm which assure the free circulation of air inside and outside of the underwear, and allows air control of the dry suit at any ascent speed. Zipper with double locks, chest pocket with zipper, large thigh pockets, elastic fabric in collar, sleeves, ankles and a wide waist band. Thumb loops and leg retainers ease donning.

The light model is recommended for warm water diving and under immersion suits in normal conditions. The Heavy model is suitable especially for cold water diving and under immersion suits in winter conditions.

## URSUIT SFU

The Ursuit SFU (Seamless Functional Underwear) is a technical underwear for active use. The Ursuit SFU underwear is produced with seamless knitting technique and is therefore comfortable in use - like a second skin.

Material: 67% Polypropylene, 26% polyamide, 7% elastane.

The Material is breathable and antibacterial which prevents odor. Therefore the Ursuit SFU is the underwear for the most demanding user.

The Ursuit SFU underwear is designed especially to be used underneath a dry suit, to be

worn next to the skin. The skin remains dry and cool even during and after a hard exercise. Between the Ursuit SFU underwear and the dry suit we recommend the use of an X-Text® Finfill Light or Heavy thermal undersuit, to create the necessary thermal insulation.

Washing instruction for the product: 40°C, without rinsing agent. No drying machine, no bleaching.

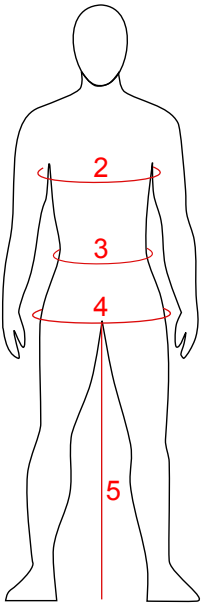

Available in male and female sizes.

DRYSUITS FOR  
PROFESSIONALS

## URSUIT SEA HORSE SAR

The non insulated Ursuit® Sea Horse SAR (5020II) is designed for hard professional use. It has been chosen by the defence forces, border guards, sea rescue associations, and merchant vessels in several European countries. Especially for open sea conditions it has proved to be by far the best of immersion suits.

Material: Gore-Tex® fabric based upon the ePTFE membrane, which lets vapour penetrate but which is completely watertight.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100 % watertight.

Dry zipper: opens from the right hip up to the left shoulder. The position of the zipper as well as its opening direction minimize the disadvantages of a heavy zipper when sitting and moving around.

Telescope waist: integrated braces keep the trouser part up at the same time as the crotch strap keeps the upper part down. Thanks to the

telescope design the trousers do not fall down in the way they may do in a normal one piece overall. Persons of different height can use the same suit without the ergonomic features being weakened.

Neck seal: 2,5 mm super stretch neoprene. For easy donning, rubber surface is on the outside.

Wrist seals: super stretch neoprene, easy to don and doff. The neoprene also keeps you warm in cold conditions.

Thermal hood: 3 mm neoprene, protects against cold water.

*The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1. Solas approved, 1hr.*

## URSUIT RDS WE WIND ENERGY

A special model of the popular RDS Rapid Donning Suit especially made to meet the demands of the offshore industry.

Collar structure is open, which eases donning and enables ventilation in warm weather.

Material: Gore-Tex® fabric based upon the ePTFE membrane, allowing vapour to get through but remaining completely watertight.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100 % watertight.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assures visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment.

Socks made of same fabric as the suit itself enables use of any professional footwear.

Knee and back reinforcements made of Cordura material.

Hood: attached hood, which protects against wind and rain. Separate 3 mm neoprene hood, which protects against cold water.

Gloves: integrated 3mm 5-finger neoprene gloves in sleeve pockets.

*The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1. Solas approved, 1hr.*

## RDS RAPID DONNING SUIT

RDS suit is especially suitable for emergency situations with quick departures. It is light and comfortable and it's suitable for authorities as a boating suit and for leisure boating and fishing.

Collar structure is open, which eases donning and enables ventilation in warm weather.

Material: Gore-Tex® fabric based upon the ePTFE membrane, allowing vapour to get through but remaining completely watertight.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100% watertight.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assures visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment.

Boots: Polyurethane boots with broad fitting and strong non slip soles.

Knee and back reinforcements: Cordura.

Thermal hood: separate 3 mm neoprene hood, which protects against cold water. Attached hood, which protects against wind and rain.

Gloves: integrated 3mm 5-finger neoprene gloves in sleeve pockets.

*The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1. Solas approved, 1hr.*

## URSUIT RDS ETSO

The RDS ETSO is specially designed as an off-shore helicopter transit suit. The suit is made of highly breathable, flame resistant Gore-Tex Nomex.

The RDS ETSO includes a special detachable liner containing high-tech Outlast material, which is able to adapt to varying heat conditions by absorbing and releasing heat energy. Due to the open-neck structure, the RDS ETSO is very quick to don and doff. Also, when necessary, the ventilation of the suit is very easy. Socks made of same fabric as the suit itself enables use of any professional footwear.

Knee and back reinforcements made of Cordura material.

Attached splash hood, which protects against wind and rain. In addition a separate 3 mm neoprene hood, which protects against cold water. 3mm 5-finger neoprene gloves are integrated in sleeve pockets.

Supplied in a carrying bag.

*The suit is ETSO-2C503 approved. Solas approved, 1hr.*

## URSUIT OVER WATER FLIGHT SUIT (5030)

A working suit for the pilots and the crew members, which is made of the breathable and wear resistant three-layer Gore-Tex laminate.

Material: most durable Gore-Tex® three layer fabric which breathes. On a request also available in NOMEX (additional price).

Seams: double seams so that the seam does not open even if worn. Inside heat seal taping and reinforcement that guarantees 100 % water tightness.

Colour: orange or green. Sizes: 46 – 58.

Reflective tapes: the suit is equipped with several reflective tapes in right places, which assure visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment.

Adjustable waist elastic. Gore-Tex® socks, leg

zippers. Reinforcement on the knees. Reinforcement at the backside. Dry zipper from the left shoulder to the right hip.

Integrated braces. 2 large thigh pockets with velcro fasteners, velcro fasteners for chart pockets. Knife pocket on the right thigh. Phone pocket on the left thigh. Chest pockets with zippers. 2 velcro fasteners for the attachment of badges on both shoulders.

2 light pockets on the sleeves. 2 pen pockets on the sleeves. 2 leg pockets. Wrist seals of super stretch neoprene, keep the wrists warm. Thermal 5-finger gloves of neoprene, with velcro fasteners. Thermal hood of 3 mm neoprene.

The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1.

## URSUIT BASIC

An affordable basic suit with SOLAS approval.

Together with AES 70 N Buoyancy Vest the immersion suit becomes a so called AES suit (Anti Exposure Suit). The combination is in accordance with the requirements of the Directive for Marine Equipment 96/98/EC (MED).

The suits material is waterproof and breathable 4-Tex fabric.

A PU-zipper form the shoulder to the hips. Integrated sleeve pockets with the neoprene gloves.

The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1. Solas approved, 1 hr.

## URSUIT 5001

An abandonment suit for the crew on board in merchant vessels and open rescue boats and isolated survival and rescue suit for the crew on board in fishing boats.

Material: flame retardant 5 mm cell neoprene.

Seams: glued and sewn.

Colour: red.

Reflective tapes: placed in accordance with the directive on marine equipment.

Oil resistant rubber soles. Adjustment straps at the ankles. Dry zipper opens at the left ear. Chest pocket with velcro fastener. Whistle. Buddy line on the left sleeve. Attached 5-finger thermal gloves, with polyurethane surface. Attached neoprene hood with face seal.

Solas approved 6hr.

## URSUIT ONE SIZE

The One Size is a patented suit (patent no 95554), which adapts itself to the measurements of the user. One Size is the suit for adventure travelling and rib safari excursions. It is also the right choice for companies with rental activities, that wish to take care of the safety of their customers, in all conditions. Thanks to the construction of the model the need for different sizes is minimised.

One Size is approved in accordance with the directive on marine equipment. It is also suitable for the varying personnel and passengers on board merchant vessels. One Size grows or gets smaller together with the user. The smallest family members do not have to be left on shore or be sent out to sea without adequate equipment.

Material: Vapour permeable and watertight 4-TEX.

Seam construction: The double seams have an inside elastic, which allows the suit to expand to the measurements of the user. Inside the seams are heat seal taped and reinforced for 100% water tightness.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assure visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment.

The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1. Solas approved, 1hr.

## URSUIT RDS RAPID DONNING SUIT

The Ursuit RDS suit is especially suitable for the user's who are looking for a suit that is quick and easy to don. It is light and comfortable and it is suitable for authorities as a boating suit and for leisure boating and fishing.

Collar structure is open, which eases dressing and enables ventilation in warm weather.

Material: Gore-Tex® fabric based upon the ePTFE membrane, allowing vapour to get through but remaining completely watertight.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100 % watertight.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which

assure visibility in all conditions. The soft and durable reflective tapes are developed by 3M in accordance with the directive on marine equipment.

Boots: Polyurethane boots with broad fitting and strong non slip soles.

Knee and back reinforcements made of Cordura material.

Thermal hood: 3 mm neoprene hood, which protects against cold water. Attached hood, which protects against wind and rain.

*The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1.*

DRYSUITS  
FOR MILITARY &  
LAW ENFORCEMENT

## URSUIT RDF

An immersion suit for professional use.

A tactical dry suit for special forces and professionals, manufactured of breathable and wear resistant three-layer Gore-Tex® laminate.

Seams: double seams so that the seam does not open even if worn. Inside heat seal taping and reinforcement that guarantees 100% water tightness.

Construction: One piece suit with integrated socks. Braces inside. Neoprene seals at neck and wrists. Spray hood in the protecting collar. Designed to be used with a helmet. Reinforcements on knees and back.

References: The Finnish Border Guard, The Finnish Coast Guard, The Finnish Customs, The Finnish Police Forces, The Italian Navy Forces.

The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1.

Details: Plastic front zipper, opening from the left shoulder to the right hip. Plastic pee zip.

Pen pocket on both sleeves. Velcro tapes for badges. Phone pocket with zipper closure on the chest.

Leg protectors with zippers and pockets. Wrist seal protectors with Velcro closure.

Standard equipment: Separate neoprene hood and gloves, carrying / storage bag.

## URSUIT ATOS

Ursuit ATOS - A tactical dry suit for special forces and professionals, manufactured of breathable and wear resistant three-layer Gore-Tex® laminate.

Inside heat seal taping and reinforcement that guarantees 100% water tightness. One piece suit with telescope waist, integrated socks, suspenders. Neoprene seals at neck and wrists. Spray hood in the protecting collar.

Reinforcements on knees and back. Metal front zipper, opening from the left shoulder to the right hip. Metallic relief zipper. Pen pocket on both sleeves. Velcro tapes for badges. Phone pocket with zipper closure on the chest. Thigh pockets with zipper closure + detachable map pocket and m.o.l.l.e. pocket. Leg protectors with zippers and pockets..

References: The Finnish Defence Forces, The Swedish Sea Police in Stockholm and Visby, The German Sea Police in Kiel (SEK).

The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1.

Standard equipment: Separate neoprene hood and gloves, carrying / storage bag.

A wide-angle photograph of three kayakers in red drysuits paddling on a calm body of water. In the background, there are large, white icebergs and distant, hazy mountains under a clear blue sky. The kayakers are positioned across the lower third of the frame, each in a red kayak and holding a wooden paddle. The water is still, reflecting the kayakers and the sky. The overall scene conveys a sense of adventure and outdoor recreation in a cold-weather environment.

DRYSUITS  
FOR WATER  
ACTIVITIES

## URSUIT AWS ACTIVE WATERSPORT SUIT

AWS Active Watersport Suit is manufactured for paddling, dinghy sailing and for other activities done in a sitting position. The simple design concentrates on the most essential features: comfort and keeping dry, leaving out excessive details. The suit design considers especially the different measurements of the back and the front parts, to achieve maximum comfort in a sitting position.

Material: Vapour permeable and water tight 4-Tex®.

Seam structure: patented seam structure, that is based on the Flat Seam-technology. Because of this technology the multiple layers can be avoided.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assure visibility in all conditions. The soft and durable reflective tapes are in accordance with the directive on marine equipment.

Neck seal: Patterned 2,5 mm super stretch neoprene. For easy dressing the patterned rubber surface is on the outside.

Wrist seals: super stretch neoprene, easy to dress and undress. The neoprene also keeps your wrists warm in cold conditions.

Thermal hood and gloves: 3 mm neoprene hood protects your head against cold water. The gloves are 5-finger type and made of 3 mm neoprene.

Knee and back reinforcement.

Weight ca. 1,4kg (size L).

Also available in children and lady sizes.

AVAILABLE COLORS:

Suit is CE-approved according to the directive 89/686/EEC

## URSUIT MPS MULTI PURPOSE SUIT

A unique drysuit to combine with any other clothing.

The Ursuit MPS Multi Purpose Suit is a very lightweight dry suit to be worn under an outer garment like a traditional foul-weather gear. Thanks to the breathable Gore-Tex®-fabric, the MPS will keep you dry, even when worn together with outer clothing that does not breathe.

The Ursuit MPS is suitable for all kinds of boating, fishing, paddling and for example nordic skating.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be

100 % watertight. Integrated socks.

Extremely light double lock zipper.

Neck seal and wrist seals warming and waterproof 3mm neoprene. Easy to don and doff.

Weight under 1 kg (size L).

Also available in children sizes.

The suit is CE-approved according to the directive 89/686/EEC

## URSUIT SEA HORSE

A top quality suit for the most demanding user. The Ursuit Sea Horse model includes all of the best properties of an immersion suit. Its ergonomics is of its very own class and the comfort is superior. Thanks to the telescope waist construction it fits well and it is comfortable and light to wear. It keeps you dry regardless of how long you will stay in water. It functions perfectly, in all conditions.

Material: Gore-Tex® fabric based upon the ePTFE membrane, which lets vapour penetrate but which is completely waterproof.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100% watertight.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assures visibility in all conditions. The soft and du-

nable reflective tapes are made in accordance with the directive on marine equipment.

Knee and back reinforcement

Dry zipper is situated from the right hip up to the left shoulder. The position of the zipper minimise the disadvantages of a heavy zipper when sitting and moving around.

Telescope waist: integrated braces keep the trouser part up at the same time as the crotch strap keeps the upper part down. Thanks to the telescope design the trousers do not fall down in the way they may do in a one piece overall. Persons of different height can use the same suit without weakening the ergonomic features.

AVAILABLE COLORS:

The suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1.

## URSUIT SEA HORSE COMFORT

Sea Horse Comfort means a state of physical ease and freedom to focus on the essentials – stay comfortably dry. Thanks to the telescope waist construction it fits well and it is comfortable and light to wear. It keeps you dry regardless of how long you will stay in water. It functions perfectly, in all conditions.

Material: vapour permeable and water tight 4-TEX®.

Seam construction: double seams so that the seam will not open even when worn. Inside the seams are heat seal taped and reinforced to be 100% watertight.

Reflective tapes: The suit is equipped with several reflective tapes in right places, which assures visibility in all conditions. The soft and durable reflective tapes are made in accordance with the directive on marine equipment.

Knee and back reinforcement are made of durable Cordura fabric.

Relief zipper as standard.

The dry zipper is placed from the right hip up to the left shoulder. The position of the zipper minimizes the disadvantages of zipper when sitting and moving around.

Telescope waist: integrated braces keep the trouser part up at the same time as the crotch strap keeps the upper part down. Thanks to the telescope design the trousers do not fall down in the way they may do in a one piece overall. Persons of different height can use the same suit without weakening the ergonomic features.

The suit is CE-approved according to the directive 89/686/EEC

## URSUIT GEMINO OPERATIVE

The Ursuit Gemino Operative presents the newest technology in the field. Thanks to the two-piece structure you can separate the jacket and the trousers for example while at land. The Ursuit® Gemino Operative is a stylish suit, that keeps you dry and in the swim under all conditions, no matter whether your passion is fishing, boating, paddling or rapid shooting.

Material: four-layer 4-Tex®, that is breathable but still waterproof.

Seam structure: patented seam structure, that is based on the Flat Seam technology. Because of this technology the multiple layers can be avoided.

Neck and wrist seals are made of waterproof and warming Super Stretch neoprene.

Knee and back reinforcements.

Thanks to integrated 4-Tex® socks you can choose shoes that fits best for your needs.

Large, splash waterproof pockets on both thighs.

Anorak style jacket with a large central pocket.

Leg and wrist tightening with reflective tapes.

High collar that is lined with water resistant fleece. Inside the collar yellow fluorescent hood.

Braces in trousers. Fly zipper. Waist band. Includes separate neoprene hood and gloves. In upper part of the trousers a pocket for phone.

Available in red and black.

On a request also available in orange Gore-Tex (SOLAS approved).

AVAILABLE COLORS:

Suit is CE-approved according to the directive 89/686/EEC and the standard EN ISO 15027-1.

## URSUIT GEMINO VENTURE

Ursuit's two-piece drysuit Ursuit® Gemino Venture with light Gore-Tex keeps you dry in all conditions, no matter whether your passion is fishing, boating or paddling. Like other Ursuit suits Gemino Venture is designed with a long lifespan. All the details are results of a long R&D. The CE mark stands for the guarantee of the quality and safety.

Material: Lighter Gore-Tex for optimal mobility

Latex neck and wrist seals assure the water tightness.

Reflective hood with the high thermal collar.

Jacket is lighter Gore-Tex® (135 g/m<sup>2</sup>) which is optimal for extreme mobility. Design allows wide movement of hands which is ideal for e.g. fishing or paddling.

The jacket flab can be tightened with adjustable velcro straps. Canoeist: the hem of the jacket is long enough to cover the rim of the spraydeck.

Knee and backside reinforcement of durable Cordura® fabric.

Trousers are made of durable Gore-Tex® (185 g/m<sup>2</sup>) for additional endurance. The design is ideal for e.g. paddling or fishing where the mobility is needed.

Thanks to integrated Gore-Tex® socks you can choose shoes that fits best for your needs.

The suit is CE-approved according to the directive 89/686/EEC

## URSUIT GEMINO ACTION

The suit is manufactured from high quality Gore-Tex® Taslan material which is light weight but still robust. The crotch, knees and elbows have an additional layer of protective material to extend the lifetime of the suit. The neck seal and wrist seals are made of elastic neoprene which makes the use more comfortable. The neoprene is also warmer than i.e. latex in colder weather. The suit is completely wind and water tight and keeps you dry and high afloat if you happen to fall into the water.

Gemino Action is the ultimate two-piece suit for predator fishing, but it is also a great suit for paddling or sailing. It has a big attached hood that gives you the possibility to wear a hat or a cap underneath. The hood can be adjusted to fit perfectly by tightening or loosening four tensioners. The fleece-lining in the front of the collar/hood gives the user a comfortable feeling. The suspenders are designed in a way so you can remove the pants without removing the

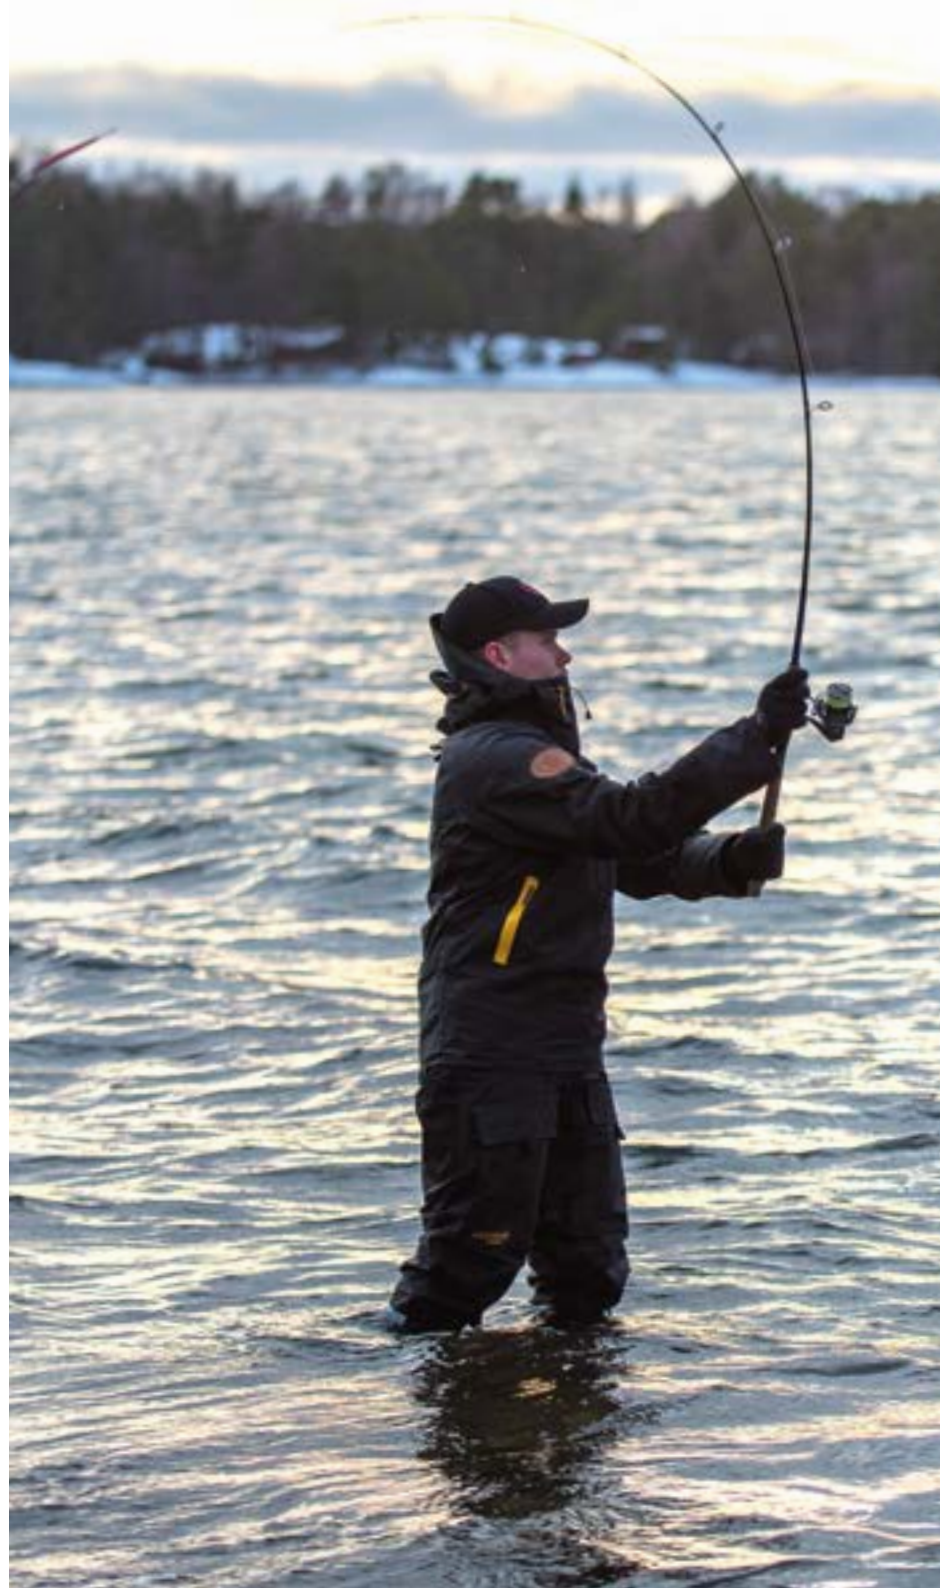

top. The two-piece function makes it possible to wear the jacket and the trousers separately or you can attach them to get a dry suit.

The pockets on the jacket are big and have splash proof zippers. The location of the pockets makes them easy to use even when wearing a life jacket. The Jacket is also equipped with three attached D-rings, one in the neck and two down on the back side. The D-ring in the neck can be used to hang the net from and the two others can be used to hang other equipment from. The pockets on the trousers are located on the front side of the thighs. The trousers are equipped with splash a guard that protects the socks and can be pulled on top of rubber boots or normal boots.

The suit is delivered in a black suit bag including the suit, 3mm neoprene gloves, hat and user's manual.

*The suit is CE-approved according to the directive 89/686/EEC*

## URSUIT EASY

The Ursuit Easy is a stylish dry suit that is easy to don and doff. Its comfort and appearance are similar to those of normal clothing, yet it is completely waterproof - like any other Ursuit dry suit.

The front zipper opens at the neck seal, assuring easy and fast donning. The dry zipper is covered by a protecting flap with push buttons.

The high collar with fleece lining is detachable when not required, which in some circumstances may be a good option. A protecting hood is found inside the collar. Thanks to the integrated socks, you can choose the footwear which fits your needs in the best possible way.

The Ursuit Easy is not just a dry suit for water activities, but a suit for all kinds of use when you want to stay 100% dry. Thanks to the stylish design, this suit looks more like normal clothing than a dry suit. The fit is also optimal for women thanks to the adjustable waist band.

Water tight chest pockets are standard. The thigh pocket is equipped with fasteners for the

attaching of a Squeeze Lock knife (the knife itself is optional).

Material: Vapor permeable and water tight 4-Tex® fabric.

Prominent reflective tapes assure the visibility.

The wrist and neck seals are made of elastic neoprene, making donning easier and adding to the thermal insulation at the wrists and neck.

Separate neoprene gloves and hood give additional thermal protection.

Knee and back reinforcements.

AVAILABLE COLORS:

*The suit is CE-approved according to the directive 89/686/EEC*

## URSUIT MÄRKET

Ursuit bibs and braces, named after the lighthouse standing high and mighty in the sea of Åland, are made of high quality and breathable Dry Comfort XT® fabric by F.O.V. Fabrics Sweden AB.

The jacket and the trousers are designed to give the best mobility and comfort in any situation. The jacket has a big attached hood that gives you the possibility to wear a hat or a cap underneath. The hood can be adjusted to fit perfectly. The pockets on the jacket are big and have splash proof zippers. The Jacket is also equipped with two attached D-rings, one in the neck and one down on the back side. The D-ring in the neck can be used to hang the net from and the other can be used to hang other equipment from. The jacket has one inner pocket that can be closed with a zipper. The sleeves can be tightened against the wrist.

The trousers have an additional layer of protective material on crotch and knees to extend the lifetime. The suspenders are designed in a way so you can remove the pants without removing the jacket. The trousers have four pockets. Two of the pockets are located higher up and are equipped with splash proof zippers. The two other pockets are located lower on the thighs and can be closed with a flap. The trousers have a tightening band at the end of the leg to enable tightening to the boot shaft. The waist part is higher than normal to give better protection against wind. The waist section has a fleece lining to give additional comfort.

## URSUIT SNAPBACK CAP
